# NOTRE DAME UNIVERSITY BANGLADESH

# VLSI Design Lab Report-01

**Course Code: CSE-4218**
**Course Title: VLSI Design Lab**
**Lab Task Topic: Setting Up DSCH2 & build logic gates**

## Submitted by:

**Name: Istiak Alam**
**ID: 0692230005101005**
**Batch: CSE-20**

**Submission Date: January 17, 2026**

## Submitted to:

**Nfisa Tabassum,**
**Lecturer, Dept. of CSE**
**Notre Dame University Bangladesh**

# Table of Contents

1 Objective 1

2 Tools and Environment 1

3 Discussion 1

4 Conclusion 1

# 1 Objective

The objective of this lab is to understand the basics of Computer Graphics programming using OpenGL and GLUT. In this experiment, a simple house structure is created using basic geometric primitives such as quadrilaterals and triangles in a 2D orthographic projection.

# 2 Tools and Environment

- Programming Language: C++
- Graphics Library: OpenGL with GLUT
- IDE: Code::Blocks
- Operating System: Kali Linux

# 3 Discussion

This experiment demonstrates how simple geometric shapes can be combined to form complex objects using OpenGL. The use of orthographic projection simplifies the coordinate calculations and is suitable for 2D graphics applications.

# 4 Conclusion

In this lab, a house was successfully drawn using OpenGL and GLUT. The experiment helped in understanding basic OpenGL functions, coordinate systems, and drawing primitives. This knowledge forms the foundation for more advanced graphics programming.
